

Joni's Health Update

As you may have heard, in the past few weeks, Joni has been dealing with pain. After testing, doctors have discovered that she has a small fracture in her sacrum, a bone at the base of the spine. For someone like Joni in a wheelchair, part of the healing process means that she must limit her 'sitting up hours' until the bone is repaired, but Joni has been given every assurance that it will, indeed, heal.

She would very much appreciate your prayers that God would speed the healing and cause this area of her back to be stronger than ever before. Ask the Lord to protect Joni from further harm or injury. We would also be grateful if you would pray for Joni's husband, Ken, and her friends who have been assisting her through this difficult time—Joni would assure you they have been wonderfully supportive and so helpful! She appreciates you joining her in asking God to shower His grace and blessing on them. Thank you for your care and concern.
